Problem Description:

How to append a string in an existing file?

Solution:

This example shows how to append a string in an existing file using filewriter method.

```
import java.io.*;

public class Main {
    public static void main(String[] args) throws Exception {
        try {
            BufferedWriter out = new BufferedWriter
            (new FileWriter("filename"));
            out.write("aString1\n");
            out.close();
            out = new BufferedWriter(new FileWriter
            ("filename", true));
            out.write("aString2");
            out.close();
            BufferedReader in = new BufferedReader
            (new FileReader("filename"));
            String str;
            while ((str = in.readLine()) != null) {
                System.out.println(str);
            }
        }
        in.close();
        catch (IOException e) {
            System.out.println("exception occoured"+ e);
        }
    }
}
```

Result:

The above code sample will produce the following result.

```
aString1
aString2
```
